PROJECTS

YouTube Data Analysis using Hadoop

4 months

YouTube data is getting created in a very huge amount and with an equally great speed. The main objective of this project is to demonstrate and analyse how data is generated and can be mined and utilized to make targeted, real time and informed decisions.

Facial Expression Recognition based Restaurant Scoring System

4 months

Now a days unmanned restaurants are fashion. So the rating system for the environment and food of the restaurant has been advanced by new technologies. Hence we are making it easier by Facial Expression Recognition with the help of web server.
